

ID	: 88	
Patient Name	: MST. NAHEED IMRAN	43Y/F
Referred By	: RESPECTED DR	
USG By	: DR. SAIRA IQBAL	
Date	: Tuesday, August 23, 2022	12:06 PM

## Ultrasound Abdomen

**Liver** - is normal in size ( 13.9cm ). Parenchymal echogenicity is increased. Echotexture is normal. No focal lesion seen. Margins are regular. Main Portal vein ( 1cm ) and Hepatic Veins are normal. CBD is normal in caliber ( 0.4cm ). Intra-hepatic biliary passages are not dilated.

**Gall Bladder**- is partially distended. Wall thickness measures ( 0.4cm ).  
**Pancreas** -It shows normal and homogeneous parenchymal echogenicity.

**Spleen** - It shows normal size ( 10.7cm ). It has normal and homogeneous parenchymal echogenicity.

### KIDNEYS -

**Right** - It shows normal size ( 10.2cm ). It has smooth outline and homogeneous echogenicity. No mass or cyst is seen. Pelvicalyceal system is not dilated. **A small calculus measuring about 0.5cm is seen near the upper pole.**

**Left** - It shows normal size ( 9.9cm ). It has smooth outline and homogeneous echogenicity. No Calculus, mass or cyst is seen. Pelvicalyceal system is not dilated.

**Ureters** - are overshadowed by bowel gas on both sides. There is, however, no appreciable dilatation of the proximal ureters on either side.

**Urinary Bladder** - It is partially filled.

**General** - No Para-Aortic or Pelvic lymphadenopathy. No free fluid seen in the pelvic or peritoneal cavities.

### Conclusion:

- ➔ Fatty change liver ( Grade 1 ).
- ➔ Small renal calculus right.

Monday to Saturday, 8:30 am to 8:30 pm **SUNDAY CLOSED** Friday Prayer Break 12:30 to 2:30 pm
